

HVMV WORKSHOP

From Human Vision to Machine Vision

Bridging the gap between biological and computational visual systems – fostering collaboration between human vision and machine vision researchers across visual computing.

WHEN

Monday – Thursday session

DURATION

3.25 hours (9:00am – 12:15pm)

FORMAT

Keynotes • Q&A • Panel discussion

TOPICS

Neural networks as models of human vision

Perceptually-optimized rendering & displays

Interpretability of machine vision systems

Computer graphics for studying human vision

Opportunities for interdisciplinary collaboration

INVITED SPEAKERS

Prof. Rafał Mantiuk

University of Cambridge

Psychophysics • computational displays • image quality

Prof. Laurie M. Wilcox

York University

3D vision • depth perception • VR/AR

Dr. Aaron Hertzmann

Adobe Research • Univ. of Washington

ML • computational photography • art perception

Dr. Richard Zhang

Adobe Research

LPIPS • perceptual deep learning • generative models

SCHEDULE AT A GLANCE

9:00

Opening

9:05 – 10:20

Talks 1 & 2 + Q&A

10:20 – 11:40

Talks 3 & 4 + Q&A

11:45 – 12:15

Panel discussion

ORGANIZERS

Kenneth Chen • kennychen@nyu.edu**Dr. Colin Groth** • c.groth@nyu.edu**Dr. Alexandre Chapiro** • achapiro@meta.com**Dr. Niall L. Williams** • n.williams@nyu.edu**Jenna Kang** • jennakang@nyu.edu**Prof. Qi Sun** • qisun@nyu.edu

NYU

Univ. of Zaragoza

Meta Reality Labs

PRIMARY CONTACT

Kenneth Chen • kennychen@nyu.edu
